**adorable
intelligence**

Motorola Nursery is proud to introduce a new era of smart baby care with Adorable Intelligence, our signature mark of innovation.

It brings together advanced artificial intelligence, meaningful insights, intuitive design, and secure technology to help parents feel more supported, informed, and in control.

Adorable Intelligence reflects our commitment to making parenting smarter, more confident, more connected, and above all, more secure, beginning with the PIP1710 CONNECT.

Secure and private
connection

BeyondCry™

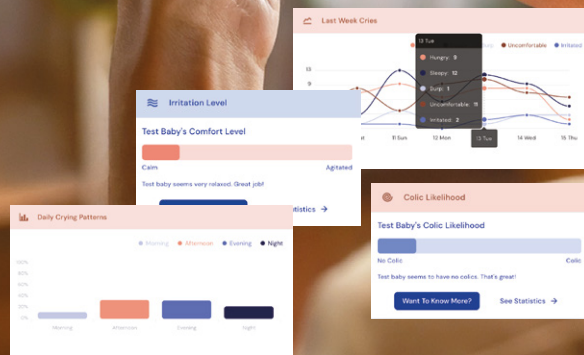

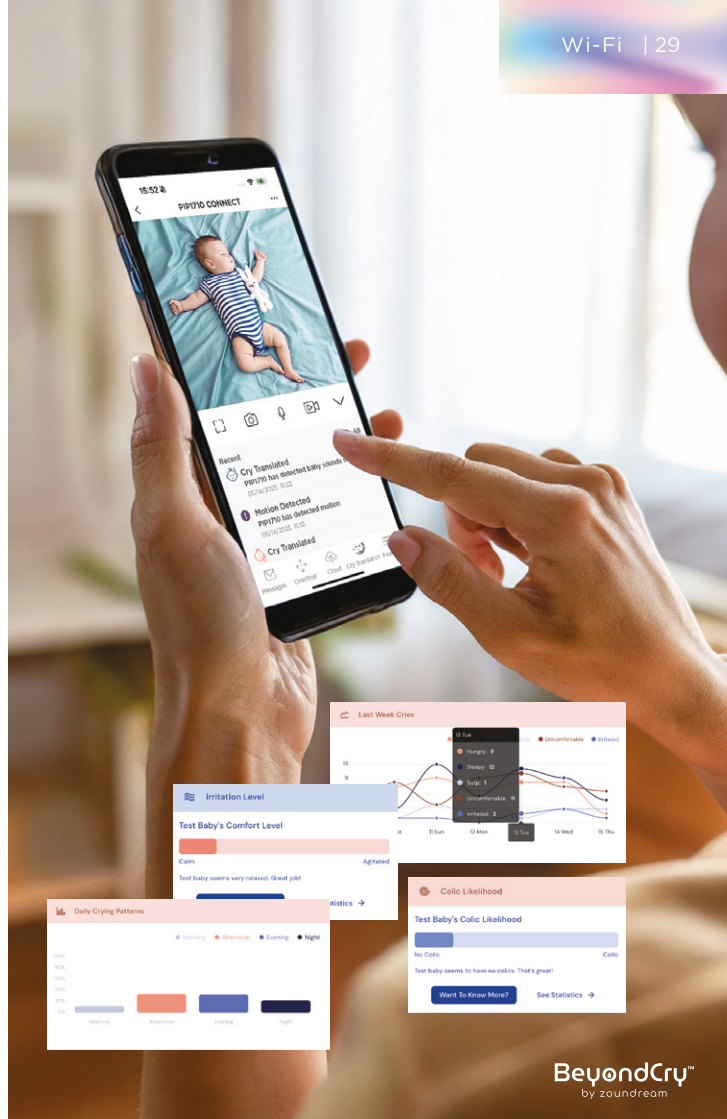

Crying is a newborn's way of expressing their needs. With the power of AI, you can now better understand those cries in real time, staying connected and responsive to what your baby needs most.

At the heart of the PIP1710 CONNECT is Zoundream's BeyondCry™ technology, an advanced AI system trained on over 10 million hours of real-world audio. This intelligent system recognises and translates five key types of baby cries: Sleepy, Hungry, Uncomfortable, Burp, and Irritated.

As your baby grows, BeyondCry continues to learn and adapt, providing personalised insights that evolve over time, helping you build confidence and respond quickly and intuitively.

Receive real-time cry notifications and translations on your parent unit or app. Through the app, explore a dashboard of trends, tips, and tailored insights to support you throughout your parenting journey.

Enjoy a 30-day free trial of BeyondCry™. After the trial, simply subscribe to continue using the feature. Terms and conditions apply
